

**BLU-GARD SANITIZING TEAT DIP - benzenesulfonic acid solution**  
Ecolab Inc.

**FOR COMMERCIAL USE ONLY**  
**KEEP OUT OF REACH OF CHILDREN**  
**NOT FOR HUMAN USE**

**CAUTION**

Not for internal use. May cause eye irritation. If swallowed, may cause irritation, nausea, stomach distress.

**PRECAUTIONARY STATEMENTS**

No protective equipment is necessary under normal use conditions. If splashing may occur, eye protection is recommended.

*Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment.*

**FIRST AID**

**If in Eyes:** Immediately flush eyes with plenty of cool running water. Remove contact lenses; then continue flushing for at least 15 minutes, holding eyelids apart.

**If Swallowed:** Rinse mouth; then immediately drink 1 or 2 large glasses of water. DO NOT induce vomiting. Never give anything by mouth to an unconscious person.

IF IRRITATION OR DISCOMFORT PERSISTS, CALL A PHYSICIAN.

**DIRECTIONS FOR USE**

**IMPORTANT:** Do not mix *Blu-Gard* with water, any other teat dips or other products unless specified in product use instructions.

If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for *Blu-Gard*.

If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return any unused product to the original container.

**Before Milking:** Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip or teat spray to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

**Pre-Milking Dipping:** Fill teat dip cup with *Blu-Gard*. Do not dilute. Before each cow is milked, dip each teat full-length into the teat dip cup containing *Blu-Gard*. Wipe teats dry after dipping, using single-service towels to avoid contamination of milk.

**Post-Milk Dipping:** Immediately after each milking, use *Blu-Gard* at full-strength. Dip each teat full-length into the teat dip cup containing *Blu-Gard*. Allow to air dry. Do not wipe. Always use fresh, full-strength *Blu-Gard*. Do not turn cows out in freezing weather until *Blu-Gard* is completely dry.

**Expanded Usage:** When freshening cows, begin dipping teats twice daily for about 10 days before calving.

**Precaution:** *Blu-Gard* is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.
